

Communication of Responsibly Produced Peat (RPP)

Communication of product label of Responsibly Produced Peat:

The certified peat in this growing medium has been produced responsibly, in compliance with stringent criteria on peatland selection, extraction and after use.

Communication of key message Foundation Responsibly Produced Peat:

Responsibly Produced Peat is a European multi-stakeholder organisation (peat industry, scientists, NGOs) that has established a reliable, transparent certification system for responsible peat extraction. The certification scheme does not allow peat extraction from valuable peatlands with High Conservation Values, nor negative impact on these areas. In addition, it strongly prioritises extraction from degraded peatlands and restoration after extraction.

The aim is to bring the location, after completion of extraction, as close as possible to the natural situation.

Peat producing companies and locations are assessed by an inspector on behalf of ECAS, an independent certification body.
