

Responsibly Produced Peat in process to grant certificate

Date of publication November 6, 2023

Responsibly Produced Peat intends to grant the RPP-certificate to the company named in this document. This intended decision is based on the fact that the company meets the requirements of the RPP certification scheme version 3.0. The fulfilment of the criteria is checked by an independent qualified inspector, including inspection at location.

During a period of 6 weeks, from **November 6 until December 18, 2023** Responsibly Produced Peat offers parties concerned the opportunity to provide comment on the proposed decision. Questions and comments can be sent to info@responsiblyproducedpeat.org. Without further objections, after this comment period, the certificate will be granted to the company for the location in concern.

Company name	Neova Oy PL 22, 40101 Jyväskylä/ Yrjönkatu 42, 40100 Jyväskylä, Finland
Extraction site	Name site: Haukineva
	GPS coordinate entrance peatbog: Latitude : N 62.545834 Longitude: E 22.945975
	Total licensed area: 942,8 ha
	License information: License number LSSAVI/5455/2014, No 54/2018/1
Site description	
<u>Environment of the location:</u> Haukineva is located on the west side of the center of Peräseinäjoki close to Finnish Main Line railroad in the areas of Seinäjoki city and Jalasjärvi municipality. Surrounding land use in the vicinity of the production area is mainly forestry and peatlands. Also Neova pellet factory is located next to the production area. In the north, the production area borders the Peräseinäjoki-Jalasjärvi road. To the north of the area is the Valkianevea peat production area. There are 8 residential buildings less than 500 meters from the production area.	
<u>Protected areas:</u> There are no nature conservation areas owned by the state or on private land, Natura 2000 areas (SPA, SAC or SCI) or Finnish Important Bird Areas (FINIBA) or Important Bird Areas (IBA) areas near the inspection area, at a distance of less than 5 km from the border of the area.	

Time in exploitation:

Peat production in the Haukineva area started already at 1975. Peat production in the Haukineva area is estimated to continue for several more years.

Expected end of production based on peat reserves:

Peat production will proceed gradually meaning that on part of the area peat production comes to an end and areas will be transferred to the next land use, while in the other parts the production is estimated to continue still for 40 years. Based on the current estimation and known peat resource the production is estimated to continue for until 2063.

License valid till: until further notice except on production block 30 where environmental permit is valid until 31.12.2024

Remarks resulting from inspection:

- Peat depth maps should be prepared according to the existing information. These are ordered from the Geological survey and the maps will be provided before August 2024.
