

WeGrow – Grow with us!

Deputy Production Manager Kiritree-Young Plants Laboratory & Greenhouse (m/f/d)

Place of employment: Tönisvorst (Area Düsseldorf/Krefeld)
 Scope of work: Full time
 Entrance date: As soon as possible

Deputy Production Manager Kiritree-Young Plants Laboratory & Greenhouse (m/f/d) for our main operation at the Tönisvorst site (near Düsseldorf).
 Perfect for you if you see development opportunities in the combination of economy and ecology for your career.

Growth is our business!

Around the world, natural forests are dwindling. We at WeGrow have been working against this for over 10 years. Together with our cultivation partners, we plant the fastest-growing tree on earth, the Kiritree. In one year, this tree can grow up to 7 meters and binds 5 times as much CO₂ from the atmosphere as other tree species. It's extremely light and versatile wood replaces increasingly rare tropical woods and thus protects our tropical rainforests from overexploitation and destruction.

Our philosophy is to reconcile economic advantages with the protection of nature.

We want a team that ticks just like us. Discover the exciting and diverse professional opportunities we offer you to make your personal contribution to the climate and the environment in an environment that is enriching, inspiring and motivating. In addition to fair working conditions, a super friendly and dynamic team, we are open to your ideas and special strengths.

We would love to have you put down roots with us!

Your tasks:

As Deputy Production Manager Kiritree-Young Plants Laboratory & Greenhouse (m/f/d) you will be responsible for the fulfillment of production orders in compliance with the specified quality specifications. This includes in particular:

- Planning, monitoring, analysis and optimization of Kiritree production in close coordination with the production manager
- Organization of work processes in the production laboratory and the greenhouse, including planning of personnel deployment and their technical management
- Quality management
- Inventory management and determination of requirements for operating resources
- EDV documentation and cost controlling
- Reporting to the production manager

Your qualification:

You are a horticultural or agricultural engineer (m/f/d) and have at least 3-5 years of professional experience in a production company, preferably in the field of ornamental plants/forest trees. You have a feeling for plants as well as a strong horticultural, business and technical understanding. You are a reliable personality and act hands-on. As a pronounced organizational talent, your way of working is conscientious and structured with a high self-demand for thoroughness, precision and quality. You think and act in a results-oriented manner and are fluent in German and/or English. High resilience and flexibility round off your profile. A certificate of expertise according to the Plant Protection Expertise Ordinance would be desirable.

WeGrow as employer:

We offer you a permanent employment relationship with attractive salary and exemplary further training and career opportunities in a modern and international working environment of a future-proof industry. With a great team, we live an open and fair corporate culture with flat hierarchies. The work-life balance is not neglected either. This includes regular sports and team events, group lunches, bike leasing, a weekly sports program during the working hours and delicious hot and cold drinks.

Interested?

Then we look forward to receiving your application. The best way to do this is to use our online portal. For questions and further information, please contact Ms. Carola Könecke.

One more note: If you send us your application by post, please note that it will not be returned.

We are looking forward to seeing YOU!
