BRINGING HYDRANGEA TO A HIGHER LEVEL

HYDRANGEA INNOVATION

Permanently upgrading the Hydrangea assortment

Hydrangea has been hugely popular as both a house plant and garden plant, and for many years. To consolidate that status, innovation is indispensable. Consumers are mainly triggered by new varieties. Varieties that don't just offer more of the same, but that positively enhance the assortment. HiBreeding aims to play an important role in renewing the Hydrangea range.

Combining activities to achieve more clout

By combining our breeding and propagation activities, we will increase our clout. Sjaak van Schie B.V. and The Mastergrowers are contributing their expertise; not just as breeders, but also as growers and traders. Our comprehensive overview of the entire chain helps us to identify new trends more quickly. Trends that are then absorbed into our breeding policy.

Only the best varieties are good enough

Every year, thousands of seedlings grow and develop under professional conditions. But just a handful of varieties cross the finish line after a process of around eight years. At that point, a variety will have withstood the severest selection procedure imaginable. Among various criteria we apply are aspects such as firmness, longevity, re-blooming and flower head size.

As growers, we also seek to improve resistance against diseases such as botrytis. We also aim to create varieties that are more compact and therefore require less growth regulators. Low water consumption and rooting power are other important aspects.

A blooming future

The Hi-potentials that remain each year have a vibrant future ahead of them. Usually in limited numbers through fellow growers, in other cases as a specialty with Sjaak van Schie B.V. and The Mastergrowers.

MAY WE INTRODUCE
YOU TO OUR
HI-POTENTIALS?

HI OVERVIEW

Since the launch of HiBreeding, several varieties have already crossed into commercial production, and successfully so. However, our goal is never to achieve ‘more’ but to achieve ‘better’. Each new variety must prove itself, based on various strict selection criteria.

FIVE STEPS TO EXCELLENT HYDRANGEAS

WE TOGETHER

Collaboration as the basis of innovation

Two prominent parties in the world of Hydrangea joined forces. With HiBreeding, Sjaak van Schie B.V. and The Mastergrowers aim to make Hydrangea even more distinctive. With varieties that will continue to tempt consumers. Developed by breeders with vision.

WE INNOVATE

for the future of Hydrangea

Popular as a house plant and as a garden plant. Innovation captures attention.

WE BREED

talented new varieties

We are active throughout the whole chain from grower to consumer. Hereby we know exactly what our consumers want.

WE CHOOSE

only the best quality

New varieties await a strict selection process. We choose only the most durable and strongest varieties for our selections.

WE BELIEVE

in unlimited possibilities

It's a fascinating product, Hydrangea. A product that colours people's lives.

WE GROW

with ambition

Taking the market forward. With varieties that have the future.

OUR STORY

HiBreeding is a new name. But one with a long history. HiBreeding combines the many years of experience and expertise of two well-known names in the sector: Sjaak van Schie B.V. and The Mastergrowers. As two specialists on Hydrangeas, we know each other, and respect each other. And we share a passion for a product that still has so much unexplored potential. Potential to drive innovation. As partners within HiBreeding, we are active throughout the chain.

A unique market player

It is especially the combination of specialisations and expertise that makes HiBreeding stand out in the market. Our buyers can be found throughout the chain, from growers to retailers, garden centres and florists. Our familiarity with all aspects of cultivation and sales enables us to breed efficiently, with a consistent focus on aspects that are important to growers and buyers.

Our drive to innovate runs throughout all our activities. Our collaboration in HiBreeding enables us, as independent companies, to have an increasing impact on the market. This way, we can guarantee a vibrant future for a product with such a long history in horticulture.

**A LOVE FOR
HYDRANGEA

TOGETHER**

BREAKING NEW GROUND WITH OUR VARIETIES

About Sjaak van Schie B.V.

Sjaak van Schie B.V. is specialised in the cultivation and propagation of both half-finished and finished products. Thanks to our own propagation centre in Portugal, we can cultivate independently of all climate conditions. In Maasdijk, Sjaak van Schie B.V. grows Hydrangea as a garden plant, with pot sizes of 14 centimetre and larger. The company is one of Europe's biggest suppliers in this range.

About The Mastergrowers

The Mastergrowers resulted from the merger of Dijk van Dijk and De Bonfut, both specialised in growing Hydrangea. Dijk van Dijk's breeding activities stretch back to 2009, when Leen van Dijk – already an experienced breeder – decided to concentrate on Hydrangea. At De Lier we have ideal facilities to breed new varieties. But The Mastergrowers is also a production firm, specialised in Hydrangea as a house plant with pot sizes of 8, 10, 12 and 14 centimetre.

INTRODUCING PERLANOVA

MY BEAUTIFUL

Exciting news! HiBreeding and PerlaNova have teamed up to bring customers the best of both worlds in Hydrangea varieties. Together, we're on a mission to introduce PerlaNova's exceptional range to the global market, seamlessly complementing HiBreeding's existing product range.

PerlaNova Breeding is a pioneering company specializing in breeding of both cut and pot Hydrangeas under the trademark name My Beautiful™. Renowned for their distinctive color patterns, these Hydrangeas effortlessly captivate attention, standing out amidst the crowd. PerlaNova's dedication lies in selecting and breeding varieties that align with the latest trends and demands of both growers and consumers, ensuring a harmonious blend of beauty and market appeal.

Collaboration is in our DNA, and we couldn't be prouder to embark on this journey together.

PERLANOVA

NEW

Size
Medium

Cultivation Time
11 weeks

Re-blooms
After pruning and frost

I AM MIRA

MY COLOUR WILL CHANGE

Look at me and step back in time for a moment. I take you back to the convivial atmospheres of yesteryear. Every day, I give you this sentimental feeling all over again. My vintage look changes subtly, but my strong flowers stand the test of time!
